Education

BVRIT Hyderabad College of Engineering for Women **Sep 2021 – August 2025**
Bachelor of Technology in Information Technology | CGPA: 6.63/10 *Hyderabad, Telangana*

Summary

Dedicated Information Technology graduate with a passion for software development and continuous learning. Eager to apply my technical and problem-solving skills to contribute to organizational success and grow as a Software Engineer.

Experience

Innomatics Research Labs **Nov 2025 – May 2026**
DS with GenAI Intern (Remote) *Hyderabad, Telangana*

- Developed and evaluated 5+ machine learning models in Python and TensorFlow for Generative AI processes.
- Performed preprocessing and EDA on 10,000+ records, reducing missing and duplicate data by approximately 25%.
- Applied MLOps concepts including model versioning, deployment workflows, and production-ready machine learning practices.

Codegnan Destination **Dec 2025 – April 2026**
Python Full Stack Trainee *Hyderabad, Telangana*

- Completed hands-on training in Python Full Stack Development using HTML5, CSS3, JavaScript, Bootstrap, React, Flask, and MySQL.
- Built 3 responsive web applications while implementing RESTful APIs, SQL database operations, and Git version control.
- Developed full-stack applications by integrating frontend and backend technologies while following industry-standard coding practices.

Projects

MedPlus Pharmacy Website Clone | *HTML5, CSS3, Bootstrap 5, JavaScript* | Live Demo **April 2026**

- Developed a responsive frontend clone of the MedPlus pharmacy website using HTML, CSS, Bootstrap, and JavaScript.
- Built homepage, product category, navigation, search, offers, and footer sections to mirror a real pharmacy e-commerce interface.
- Implemented a mobile-friendly layout with Bootstrap components to ensure consistent cross-device responsiveness.

Arduino Fire-Fighting Robot | *Arduino, Embedded C, GSM Module, Flame Sensors* **March 2025**

- Developed an IoT-based autonomous fire-fighting robot using Arduino, flame sensors, and a GSM module for real-time fire detection.
- Programmed Arduino using Embedded C to automate flame detection, activate the water pump, and send GSM-based emergency alerts.
- Integrated GSM-based SMS alerts to notify users instantly during fire emergencies.

Driver Drowsiness Detection | *Python, TensorFlow, Keras, OpenCV* **October 2023**

- Developed a CNN-based driver drowsiness detection system using Python, TensorFlow, Keras, and OpenCV for real-time eye-state monitoring.
- Trained and evaluated a CNN model on the **MRL Eye Dataset (10,000+ images)**, achieving **70% classification accuracy**.
- Built a real-time driver fatigue detection system using OpenCV and deep learning to generate warning alerts.

Technical Skills

Programming Language: Python, JavaScript
Web: HTML5, CSS3, Bootstrap, ReactJS, Flask, REST APIs
Database: SQL, MySQL
Tools: Git, GitHub, VS Code,

Leadership / Extracurricular

Toastmasters Club **Sep 2021 – Aug 2025**
Club Member *BVRIT Hyderabad College of Engineering for Women*

- Participated in weekly Toastmasters sessions by delivering speeches, mentoring members, and evaluating speeches to improve public speaking confidence.
